

The most reliable carbon monoxide protection available

Residential Carbon Monoxide Alarm gives you the most reliable detection technology against a silent killer

Two hundred people die and thousands more are sickened each year by carbon monoxide (CO) poisoning. Now, from a trusted name in Home Comfort and Health solutions comes high-technology help: The Honeywell Residential Carbon Monoxide Alarm.

Honeywell C8600 Residential Carbon Monoxide Alarm

Technology that delivers reliability

- **Fewest false alarms, premature responses and failures¹**
- **The only biotechnology-based** infrared-gas sensor that mimics the human response to carbon monoxide
- **Detects low levels** of carbon monoxide (70 parts per million)
- **Quick recovery.** Rapidly returns to its original state when carbon monoxide is eliminated from the environment
- **Every unit is 100% gas-tested** to ensure accurate, timely response
- **Maintenance-free.** Proven circuit design, microprocessor and software. Solid-state infrared sensor uses a reservoir that never needs replacement
- **Microprocessor intelligence.** Self-tests every 10 minutes. Supervises sensor and alarm circuit status to ensure protection
- **One-year warranty** and long product life

¹Carbon Monoxide Detector Technology Comparison: Response to Various Cases, LBNL Report 40556 (Lawrence Berkley National Laboratory, July 1998)

Fewest false alarms

Features you want

- **Meets Underwriter's Laboratories'** (UL) 2034 Standard, C-UL (Canada) and CE (Europe)
- **Loud 85-decibel horn** and pulsating LED warn of presence of carbon monoxide
- **Energy-saving design** extends battery life to more than one year under normal use
- **Low-battery warning** "chirps" and LED double flashes
- **Warning "beeps"** notify you of mechanical failure
- **Test/Reset button.** In the *Test* mode, pressing the button makes the unit test all alarm functions. During an alarm, pressing the button temporarily quiets the alarm
- **Installs quickly** on wall or ceiling. Mount bracket, screws and 9-volt alkaline battery included. **No wiring or electrical outlets needed**
- **Provides protection** even when household electricity fails (when used as directed)

What's in it for you, as a contractor?

- **Homeowners are keenly aware** they need carbon monoxide protection
- **Consumers know** and trust the Honeywell name
- **Boost profits** with easy "add-on" sales
- **Easy install**—no wiring, battery operation lets you locate the unit almost anywhere

Homeowner peace of mind

- Detects carbon monoxide levels with the most reliable sensing technology available
- Fewest false alarms
- Energy-saving design
- Easy to use

Carbon monoxide (CO) facts

- Odorless, colorless, tasteless, poisonous gas
- Unwanted byproduct of the incomplete combustion of fuels, such as gas, oil and wood
- Nearly 5,000 people annually are treated in emergency rooms for carbon monoxide poisoning. Experts suspect many more mistake symptoms of lower-level poisoning with those of the flu and go untreated
- About 200 people die annually from carbon monoxide poisoning associated with home fuel-burning appliances
- Less than a third of U.S. households use carbon monoxide detectors
- More than two dozen U.S. cities require the use of carbon monoxide detectors
- Each home should use at least one carbon monoxide alarm, says the U.S. Consumer Product Safety Commission. Choose an alarm that meets UL Standard 2034
